## EDUCATION

### Sungkyunkwan University

*Bachelor of Computer Science & Engineering*

Suwon, South Korea

Mar. 2022 – Present

### Outsome Founder Sprint Batch 6

*Startup Founder Accelerator*

Seoul, South Korea

Apr. 2026 – May. 2026

## EXPERIENCE

### Founding Engineer & Product Manager

*Yureka (AI Education Startup)*

Mar. 2026 – Present

Seoul, South Korea

- Architected and shipped the company's first production AI education platform (yureka.co.kr) as the sole engineer, owning the full software lifecycle from system design to deployment and production operations.
- Built an agentic AI study planner that analyzes student learning data to generate personalized study plans, mentor insights, and actionable recommendations.
- Developed AI agents for Google Drive knowledge synchronization, retrieval, and automated dashboard generation, improving internal knowledge management workflows.
- Led a cross-border engineering team in collaboration with Singapore Management University (SMU), translating product requirements into engineering tasks, coordinating implementation, and reviewing deliverables.
- Defined the product roadmap and pricing strategy across planner subscriptions, 1:1 mentoring, and B2B school programs, contributing to the company's first paid partnership with a local school.

### Mobile Application Developer

*Deeplant Inc. (Industry-Academic Project)*

Mar. 2023 – Dec. 2023

Suwon, South Korea

- Developed a Flutter application for collecting meat image datasets using PDA cameras and barcode scanners.
- Implemented REST API communication between Flutter, Flask, Firebase, and a central server.
- Coordinated development tasks and schedules across the engineering team to deliver project milestones.

## PROJECTS

### Chonggak Hanwoo | *Next.js, TypeScript, Prisma, AWS, Redis, Toss Payments*

Nov. 2025 – Feb. 2026

- Designed and developed a production-ready D2C e-commerce platform independently using Next.js, Prisma, and AWS.
- Integrated Toss Payments and Kakao AlimTalk while building a custom admin dashboard for inventory, order, and delivery management.
- Generated over KRW 7.5 million in revenue during the first month after launch.

### TidyMind | *React, Node.js, LLM API*

Jun. 2025 – Aug. 2025

- Built an AI-powered task prioritization platform using LLM APIs.
- Designed prompt engineering and response parsing for reliable structured outputs.

## TECHNICAL SKILLS

**Languages:** JavaScript/TypeScript, Python, Dart, C

**Frontend:** React, Next.js, Flutter

**Backend:** Express, Flask

**Database:** PostgreSQL, Redis, Firebase

**Cloud:** AWS (CDK, ECS Fargate, RDS, CloudFront)

**Tools:** Git, GitHub, Prisma, Vercel

**AI & Integrations:** LLM APIs, OAuth, Toss Payments, Kakao AlimTalk
